

Are there regional differences in the export of microenterprises and where the hotspots are?

Microenterprise exports by country, 2020	€ / capita
Norway	2069
Iceland	2059
Sweden	2023
Ireland	1610
Estonia	1553
Faroe Islands	1030
Lithuania	910
Latvia	866
Finland	392

- Microenterprise export is important especially in rural areas with no larger companies and small home market
- Long distances do not help
- However: there are regional differences in microenterprise export, we can export hot spots also in rural areas

- Data exists, as shown here
- Further analysis will follow
- If we find why and how, it will be valuable information for all the northern and rural areas
